XI Cases of Infectious Diseases notified to the Department of Health for Scotland in the 13 weeks ended 31st March, 1962.	28
Estimated total population of Scotland at 30th June, 1961, projected to Mid-1981, by sex and age.	29
Meteorological Notes for the quarter supplied by Meteoro- logical Office, Edinburgh	30
Abstract of Meteorological observations made at eleven of the Principal Towns during the quarter	31

EXPLANATORY NOTES

Birth, death and marriage rates are calculated on the estimated population at 31st December, 1961.

Reference to average or average rate is to the average rate for the corresponding quarters of the five years 1957-1961.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth-rate shows a marked increase compared with the average of recent first quarters.

The stillbirth rate is below the average.

The marriage rate is below the average.

The death rate is slightly above the average.

The infant mortality rate is below the average.

Live Births. 26,487 births were registered in the quarter under review, 889 more than in the corresponding quarter of 1961. The rate per 1,000 population is 20·7, being 0·8 above that in the first quarter of 1961 and 1·0 above the average.

The proportion of illegitimate births 4·5 per cent. is 0·1 higher than that for the first quarter of 1961 and 0·4 above the average.

Of the 26,487 births 13,745 were of male children and 12,742 of female children being 1,079 male births per 1,000 females. Births registered in January numbered 9,065, in February 7,944 and in March 9,478, the equivalent birth-rates being 20·6, 19·9 and 21·5 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 551, and is equivalent to a rate of 20 per 1,000 total births (including stillbirths). The rate is the same as that for the corresponding quarter of 1961 and 3 below the average.

Marriages. The number of marriages registered, 10,013, is 11 more than for the first quarter of 1961. The rate per 1,000 population was 7·8. It is the same as that for the corresponding quarter of 1961 and 0·4 below the average.

Of the 10,013 marriages 2,148 were civil marriages contracted in Registrars' offices, 7,864 were solemnised by a minister of religion, and one was registered on the Authority of the Court of Session. In the corresponding quarter of 1961 Civil Marriages numbered 2,025, and those with a religious ceremony numbered 7,975.

Marriages registered in January numbered 2,019, in February 2,375 and in March 5,619, the equivalent marriage-rates being 4·6, 6·0 and 12·7.

Deaths. Deaths registered during the quarter numbered 18,516, and equalled a death-rate of 14·5 per 1,000 population. They are 236 fewer than were registered in the corresponding quarter of 1961. The rate is 0·1 less than in that quarter but 0·2 above the average.

Deaths registered in January numbered 7,058, in February 5,250 and in March 6,208, the equivalent death-rates being 16·0, 13·2, and 14·1 respectively.

Infant Mortality. Deaths of children under one year numbered 793 and are equivalent to an infant mortality rate of 30 per 1,000 registered live births. This rate is the same as that for the corresponding quarter of 1961 and one below the average. Among legitimate children the mortality was 29 per 1,000 births and among illegitimate children 54.

The neo-natal rate (deaths of infants under 28 days) was 18 per 1,000 live births and is one less than that for the corresponding quarter of 1961.

Perinatal deaths (stillbirths and infant deaths under 7 days) numbered 968, and are equivalent to a rate of 36 per 1,000 total births (including stillbirths). This rate is 2 below that for the corresponding quarter of 1961.

Sickness Benefit. The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 27th March 1962, was 329,809, of which 91,359 were in Glasgow, 25,859 in Edinburgh, 12,618 in Aberdeen and 12,207 in Dundee.

TABLE IV. *Causes of Death during First Quarters—Scotland*

	Causes of Death	First Quarters				
		1962	1961	1960	1959	1958
001-008	Tuberculosis of respiratory system	134	146	156	218	219
010-019	Tuberculosis, other forms	12	9	9	15	10
020-029	Syphilis and its sequelae	23	19	13	21	25
045-048	Dysentery, all forms	—	—	—	2	—
056	Whooping cough	1	3	2	—	3
057	Meningococcal infections	4	7	9	7	7
080	Acute poliomyelitis	—	—	—	1	1
085	Measles	—	6	—	8	—
30-044, 049-055, 58-074, 081-084, 086-138	Other infective and parasitic diseases (B4, 5, 7, 8, 11, 13, 15, 16)*	32	36	29	34	28
140-205	<i>Malignant Neoplasms</i> <i>Total</i>	2,943	2,767	2,694	2,768	2,667
160-165	Malignant neoplasms of resp. system	694	659	608	591	558
200-205	Malignant neoplasms of lymphatic and hamatopoietic tissues	168	172	123	158	139
140-159, 170-199	Other malignant neoplasms	2,081	1,936	1,963	2,019	1,970
210-239	Benign and unspecified neoplasms	40	33	36	41	26
260	Diabetes mellitus	152	169	155	164	160
290-293	Anæmias	60	63	53	72	71
40-254, 270-289, 294-299	Other general diseases	107	109	101	131	126
330-334	Vascular lesions affect'g cen.nerv.system	2,945	2,814	2,758	3,206	2,958
340	Non-meningococcal meningitis	14	12	14	16	17
300-326, 341-398	Other diseases of nervous system	260	292	263	268	271
400-402	Rheumatic fever	1	5	6	6	7
410-416	Chronic rheumatic heart disease	218	234	218	277	260
420-422	Arterioscl. and degen. heart disease	5,612	5,553	5,226	5,987	5,637
430-434	Other diseases of heart	288	272	252	289	234
440-443	Hypertensive heart disease	317	358	362	365	382
444-447	Other hypertensive disease	176	141	151	199	202
450-468	Other circulatory disease	593	576	516	657	526
480-483	Influenza	93	318	31	510	79
490-493	Pneumonia (except of newborn)	802	1,023	654	1,321	883
500-502	Bronchitis	967	1,041	809	1,492	1,001
470-475, 510-527	Other respiratory diseases	173	223	171	250	228
540, 541	Ulcer of stomach and duodenum	155	176	165	174	185
550-553	Appendicitis	15	26	23	27	23
560, 561, 570	Intestinal obstruction and hernia	111	107	90	95	99
543	Gastritis and duodenitis	3	4	3	5	3
571, 572	Diarrhœa (except of newborn)	85	53	74	81	74
581	Cirrhosis of liver	64	54	68	55	52
580, 582-586	Other diseases of liver	57	46	61	52	62
30-539, 542, 544, 45, 573-578, 587	Other digestive diseases	45	63	53	65	48
590-594	Nephritis and nephrosis	92	90	85	135	131
610	Hyperplasia of prostate	81	111	92	111	111
500-609, 611-637	Other diseases of genito-urinary system	122	127	131	115	98
640, 641, 651, 681, 682, 684	Puerperal sepsis including abortion with sepsis	4	4	1	2	3
42-650, 652-680, 683, 685-689	Other puerperal causes	9	7	12	5	12
690-749	Diseases of skin and organs of locom'n	81	103	98	106	105
750-759	Congenital malformations	221	210	174	190	164
760-762	B. injur's, post-natal asph'a & atelectasis	202	193	215	240	208
763	Pneumonia of newborn	31	26	37	42	33
764	Diarrhœa of newborn	4	5	3	7	2
765-768	Other infections of the newborn	3	5	6	5	8
769-776	Other diseases peculiar to early infancy and immaturity unqualified	139	129	109	143	148
794	Senility without mention of psychosis	135	134	146	167	185
780-793, 795	Ill-defined and unknown causes	105	93	97	85	93
E963, E970-E979	Suicide and self-inflicted injury	86	90	107	103	94

SCOTLAND

Estimated Total Population, Mid-1961, projected to Mid-1981 by sex and age.

Basis: Mid-1961 estimate of Total Population (including Scottish Armed Forces and Merchant Seamen at home and abroad, but excluding Forces stationed in Scotland who are not of Scottish domicile).

Assumptions:

Mortality: Steady decline of death-rates over the period to about one-half of the rates experienced in the years 1956-60 at ages under 45; and progressively less improvement at ages over 45.

Fertility: Births averaging 101,000 a year in first 5 years, 106,500 a year in the next 10 years, thereafter rising to about 110,000 in 1981. Male to female ratio 1.06.

Migrations: Annual net loss of 30,000 persons a year in each of the years ending 30th June, 1962 and 1963, thereafter a net loss of 22,000 persons a year (males and females in equal numbers).

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

JANUARY 1962

The mean temperature was 38.9°F, 0.6°F above average.

The warmest days of the month were the 25th, 30th and 31st fairly generally. Huntly recorded the highest day temperature, 57°F on 31st and the warmest night temperature was 50° at Kinloss overnight 30th/31st. The coldest periods occurred around 1st to 3rd and 12th to 14th and the lowest minimum air temperature was -3°F (35° of air frost) at Carnwath on the night of 1st/2nd. The coldest day recorded was at Perth on the 3rd when the maximum temperature only reached 23°F (9° air frost). The lowest temperature on the ground was -3°F at Thorntonhall and Eskdalemuir on the night of 1st/2nd.

There was an excess of sunshine except for a few places in the mid-west. Dundee and St. Andrews with 78 hours both had an excess of 28 hours over average while Onich with 12 hours had a deficit of 15 hours. Carnoustie (81 hours) was the sunniest place.

Only in some South-east districts and in places near the Moray Firth were rainfall amounts below average. In Central and Western districts there were falls of 150% or more of average and in some restricted areas amounts were 200% of normal. Except for a few places the days around 1st-3rd and 26th-28th had only small amounts of precipitation but the 15th and 30th were particularly wet days. Falls of over three inches of rain in 24 hours were reported from Sloy, Glenbranter, Strathyre, Garrows and Leadhills on 15th and from Ardgour, Broadford (Skye) and Kinlochourn on 30th.

Gales were reported on 24 days, fog on 19 days, thunder on 12 days and Aurora was reported on 11 nights. Snow or sleet fell at some place or another on each day of the month and snow was reported lying on 26 days.

FEBRUARY 1962

The mean temperature of 40.2°F was 1.1° above average. The warmest days were around the 9th and 20th and the coldest periods around the 13th and during the last week. On the 9th an air temperature of 59°F was recorded at Stonehaven and this was the highest in the month. During the night of 9th/10th temperature only fell to 48°F at Haddington. The lowest air temperature reported was 15°F (17° of air frost) at Cannich on the 24th and on the 13th at Balmoral and Braemar the maximum day temperature only reached 30°F (2° air frost). The lowest temperature recorded on the ground was 8°F at Lairg on the 24th.

There was an excess of sunshine except in the Shetlands. Kilmarnock (91 hours) enjoyed 29 hours more sunshine than the normal amount and at Arbroath, which was the sunniest place, the 98 hours recorded was 19 hours above the average. Lerwick on the other hand only measured 30 hours, a deficit of 16 hours from normal.

Rainfall was below average in Eastern districts and over much of the southern part of the country and above average elsewhere. It was dry almost everywhere from 20th-23rd but the 11th was an exceptionally wet day when the most notable daily falls measured were 4.87 inches at Glenlivet, 4.80 inches at Dalmally and 4.40 inches at Kinlochewe. At thirteen other stations falls of over 3 inches were reported.

Gales were reported on 20 days and those of 11th and 16th were particularly severe and damaging. Fog occurred on 16 days and thunder on 11 days. Snow or sleet was observed at one place or another on 24 days and snow was reported as lying at 9 a.m. on 17 days. Aurora was seen on 7 nights.

MARCH 1962

The mean temperature which was 37.0°F was 4.7°F below average. The highest temperature throughout the month was 55°F recorded at Onich on the 20th. The warmest night temperature of 42°F occurred at both West Freugh and Rhuvaal overnight 9th/10th. The lowest air temperature was 2°F (30 degrees of frost) at Braemar overnight 5th/6th and temperature rose only to 30°F (2 degrees of air frost) at Balmoral during the day on 2nd and 3rd, at Glenlee on 2nd and 3rd, at Earl's Hill (Stirling) on 2nd and at Leadhills on 3rd. The lowest ground temperature recorded over grass was -6°F at Braemar overnight 5th/6th.

There was a deficit of sunshine in Shetland, in areas adjacent to inner Moray Firth and near the south shores of the Firth of Forth. Most other places had amounts about average. Dunblane was the sunniest place with 148 hours and Baltasound the most sunless with 68 hours.

Rainfall was above average in North-eastern areas, northwards from Aberdeen and in some parts amounts were twice the normal. There was a deficit of rain in most other parts and in South and Central districts amounts were less than half the average in most places. Periods around 5th-7th and 15th-17th were dry fairly generally and the wettest days occurred during the first few days or during the last week. The heaviest rainfall in a day was 1.58 inches at Ardgour on the 26th.

Gales were reported on 12 days, fog on 18 days, thunder on 3 days and aurorae displays were seen on 12 nights. Snow or sleet was reported from one place or another on each day of the month and snow was reported as lying on 29 days.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

EXPLANATORY NOTES

Birth, death and marriage rates are calculated on the estimated population at 31st December, 1961.

Reference to average or average rate is to the average rate for the corresponding quarters of the five years 1957-1961.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth-rate shows a marked increase compared with the average of recent second quarters.

The stillbirth-rate is below the average.

The marriage-rate is below the average.

The death-rate is above the average.

The infant mortality rate is the same as the average.

Live Births. 26,915 births were registered in the quarter under review, 1,020 more than in the corresponding quarter of 1961. The rate per 1,000 population is 20·8, being 0·9 above that in the second quarter of 1961 and 0·8 above the average.

The proportion of illegitimate births, 5·0 per cent., is 0·4 higher than that for the second quarter of 1961 and 0·6 above the average.

Of the 26,915 births 13,977 were of male children and 12,938 of female children, being 1,080 male births per 1,000 females. Births registered in April numbered 8,548 in May 9,369 and in June 8,998, the equivalent birth-rates being 20·0, 21·2 and 21·1 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 534, and is equivalent to a rate of 19 per 1,000 total births (including stillbirths). The rate is 2 below that for the corresponding quarter of 1961 and 3 below the average.

Marriages. The number of marriages registered, 8,082, is 488 fewer than in the second quarter of 1962. The rate per 1,000 population was 6·2. It is 0·4 below that for the corresponding quarter of 1961 and 0·4 below the average.

Of the 8,082 marriages 1,684 were civil marriages contracted in Registrars' offices, and 6,398 were solemnised by a minister of religion. In the corresponding quarter of 1961 civil marriages numbered 1,536 and those with a religious ceremony 7,034.

Marriages registered in April numbered 3,445, in May 1,434, and in June 3,203, the equivalent marriage-rates being 8·1, 3·3 and 7·5 respectively.

Deaths. Deaths registered during the quarter numbered 15,485, and equalled a death-rate of 12·0 per 1,000 population. They are 295 more than in the second quarter of 1961. The rate is 0·3 more than in that quarter and 0·5 above the average.

Deaths registered in April numbered 5,702, in May 5,035 and in June 4,748, the equivalent death-rates being 13·4, 11·4 and 11·1 respectively.

Infant Mortality. Deaths of children under one year numbered 698, and are equivalent to an infant mortality rate of 26 per 1,000 registered live births. The rate is one above that for the corresponding quarter of 1961 and the same as the average. Among legitimate children the mortality was 25 per 1,000 births and among illegitimate children 34.

The neonatal-rate (deaths of infants under 28 days) was 19 per 1,000 live births, and is one more than that for the corresponding quarter of 1961.

Perinatal deaths (stillbirths and infant deaths under 7 days) numbered 966, and are equivalent to a rate of 35 per 1,000 total births (including stillbirths). This rate is one below that for the corresponding quarter of 1961.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 26th June, 1962, was 234,240, of which 63,218 were in Glasgow, 17,991 in Edinburgh, 8,113 in Aberdeen and 8,953 in Dundee.

TABLE I. Births, Stillbirths, Deaths and Marriages in the Counties of Cities, Large Burghs and Counties of Scotland, with the Equivalent Rates per 1,000 of Population—Quarter ended 30th June, 1962

LOCAL GOVERNMENT ELECTORS, 1962

This table has been compiled from returns furnished by Town Clerks and County Clerks, and shows the aggregate number of local government electors for Scotland, counties of cities, large and small burghs, landward areas and districts (district council areas; where elections are held every 3 years). The figures indicate to what extent seats on Councils were contested and the percentage of the electorate who voted at the local elections held in May this year. For comparison percentages are also shown for the years 1959, 1960 and 1961.

A detailed analysis of the local government election results is published each year in the Registrar General's Annual Report.

Local Government Electors and Analysis of Local Elections on the 1962 Register and Percentage of Electorate who voted.

	Local Government Electors	Analysis of Local Elections							
		No. of Councillors returned unopposed	Contested Elections						
			No. of Councillors returned	Electorate in contested Electoral Divisions or Wards	No. of ballot papers in ballot boxes	1962	1961	1960	1959
						Percentage of Electorate voting			
SCOTLAND	3,401,122	395	525	2,036,532	862,718	42.4	45.2	39.8	41.4
Counties of Cities	1,252,797	2	85	1,234,432	479,949	38.9	40.9	37.0	37.1
Large Burghs	566,914	28	139	477,784	218,972	45.8	43.8	40.8	45.2
Small Burghs	600,011	365	301	324,316	163,797	50.5	50.1	40.5	51.6
Landward Areas	981,400	—	—	—	—	—	57.8	—	—
Districts of County	976,221	—	—	—	—	—	54.6	—	—

There were contests in all of the 4 cities, in 19 of the 20 large burghs (Stirling was the exception) and in 83 of the 174 small burghs.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

APRIL 1962

The mean temperature of 44.7°F. was 0.5° below average. The warmest days occurred generally during the last ten days of the month and the highest temperature reported was 70°F. at both Stirling and Paisley on the 26th. The highest night minimum temperature was 51°F. recorded at Haddington and Dunbar overnight 25th/26th. The lowest temperature recorded was 18°F. (14° of air frost) at Balmoral on 14th, Logie Coldstone on 14th and 15th, and Achnagoichan on 15th, while on the 4th temperature did not rise above 34°F. at Earl's Hill and Glenshee during the day. On the grass the lowest temperature was 6°F. reported from Strachan in Kincardineshire on the 16th.

Sunshine was in excess of average everywhere and many records were set up. At Stornoway the amount measured was 230 hours, the highest April total there since records commenced in 1880. The sunniest place was Tiree with 254 hours which was the highest April total for that station since at least 1927. Royal Observatory, Edinburgh, and Mertoun (St. Boswells) each recorded 162 hours which was the lowest amount from Scottish stations.

Areas near the Forth, Clyde and Tweed valleys and the North-eastern tip of the mainland had more than average amounts of rain but elsewhere there was a deficit. In North-western districts amounts were only about half the average. It was mainly dry from 12th-17th and 22nd-30th. The 2nd was a particularly wet day and the heaviest rainfall in a day was reported at Brechnoille (Furnace) then.

Gales were reported on 9 days, fog on 12 days and thunder on 7 days. Auroral displays were seen on 16 nights and snow or sleet was reported from one place or another on 14 days with snow lying on 11 days.

MAY 1962

The mean temperature was 49.9°F., 0.1° below average. The highest temperature recorded was 70°F. at Paisley on the 1st—a low extreme, as seldom does temperature fail to exceed 70° in the month of May. The highest night temperature recorded was 51°F. at St. Abb's Head (8th), Dunbar (8th), Stirling (7th), Barrhead (7th), Paisley (7th and 14th), Turnhouse (8th), Pitreavie Castle (7th), Fort William (7th and 8th). The lowest temperature reported was 21°F. (11° of air frost) at Glenmore Lodge on 19th and on the 17th and 22nd the temperature only rose to 41°F. during the day at Lowther Hill. On the grass the lowest temperature was 19°F. at Glenmore Lodge on 19th.

Sunshine totals were above average in Western (excluding North-West), Central and most Southern areas and below normal elsewhere. Tiree with 268 hours (38 hours above average) was the sunniest place and Strathlyon with 97 hours the most sunless. At Lerwick the total of 110 hours was 51 hours below average.

The first five days were mainly dry in most places, and during the period 23rd to 27th only small amounts were reported. The 15th and 16th were wet days and particularly so in the North. A fall of 5.36 inches was reported from Gobnaisgach in Sutherland on the 16th and on the same day 4.61 inches was measured at Lochmore Lodge in Sutherland. The monthly totals in Ross-shire were more than twice the average while over the southern half of the country there was a deficit of rain.

Gales were reported on 14 days, fog on 18 days, thunder on 8 days and aurora was observed on 5 nights. Snow or sleet was reported from one place or another on 19 days.

JUNE 1962

The mean temperature of 55.5°F. was just average. The warmest days occurred around the period 4th to 8th and on the latter date day temperature rose to 79°F. at Glamis Castle and Batterflats (Stirling) and to 78°F. at Dundee (Mayfield), Blairgowrie and Selkirk. The highest night minimum temperature was 57°F. at Renfrew, Barrhead, Turnberry and Auchincruive—all on the 18th. The coldest nights were at the very beginning of the month and on the 1st the temperature fell to 26°F. at Coalburn (Lanarkshire) and also at Carsphairn in Kirkcudbrightshire. On the grass the lowest temperature was recorded at Lairg also on the 1st, when the thermometer read 17°F.

Sunshine amounts were above average in most eastern, southern and south-western parts of the country but they were below average in North and North-west. The sunniest place was Dunbar with 233 hours and the most sunless Blackbridge (Garve) with 120 hours.

Only small amounts of rain were measured during the first eight days of the month and again during the last three days. The 19th, 20th and 21st were wet days in the West and North. A fall of 1.94 inches at Kingairloch on the 19th was followed by another of 1.89 inches at the same station on the 21st. Districts in the North-West had a large excess of rain and Northern districts also had amounts above average. Most other areas had a deficit.

Gales were reported on 13 days and fog on 11 days, but on another 7 days hill fog occurred at Lowther Hill. Thunder was reported on 6 days and snow showers occurred at two stations, Birkhall and Fort Augustus, on 2 days and 5 days respectively.

EXPLANATORY NOTES

Birth-, death- and marriage-rates are calculated on the estimated population at 31st December, 1961.

Reference to average or average rate is to the average rate for the corresponding quarters of the five years 1957-1961.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth-rate shows a marked increase compared with the average of recent third quarters.

The stillbirth-rate is below the average.

The marriage-rate is below the average.

The death-rate is above the average.

The infant mortality rate is below the average.

Live Births. 25,375 births were registered in the quarter under review, 262 more than in the corresponding quarter of 1961. The rate per 1,000 population is 19·4 being 0·2 above that in the third quarter of 1961, and 0·7 above the average.

The proportion of illegitimate births, 4·9 per cent., is 0·3 higher than that for the third quarter of 1961 and 0·6 above the average.

Of the 25,375 births, 13,076 were of male children and 12,299 of female children, being 1,063 males per 1,000 females. Births registered in July numbered 8,781, in August 8,572 and in September 8,022, the equivalent birth-rates being 19·9, 19·4 and 18·8 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 523, and is equivalent to a rate of 20 per 1,000 total births (including stillbirths). The rate is 2 below that for the corresponding quarter of 1961 and 2 below the average.

Marriages. The number of marriages registered, 11,966, is 134 fewer than in the third quarter of 1961. The rate per 1,000 population was 9·1. It is 0·2 below that for the corresponding quarter of 1961 and 0·4 below the average.

Of the 11,966 marriages 2,204 were civil marriages contracted in Registrars' offices, and 9,762 were solemnised by a minister of religion. In the corresponding quarter of 1961 civil marriages numbered 2,082 and those with a religious ceremony 10,018.

Marriages registered in July numbered 4,370, in August 3,208 and in September 4,388, the equivalent marriage-rates being 9·9, 7·3 and 10·3 respectively.

Deaths. Deaths registered during the quarter numbered 13,459, and equalled a death-rate of 10·3 per 1,000 population. They are 55 fewer than in the third quarter of 1961. The rate is the same as in that quarter but 0·1 above the average.

Deaths registered in July numbered 4,656, in August 4,495 and in September 4,308, the equivalent death-rates being 10·6, 10·2 and 10·1 respectively.

Infant Mortality. Deaths of children under one year numbered 620, and are equivalent to an infant mortality rate of 24 per 1,000 registered live births. The rate is one above that for the corresponding quarter of 1961 but one below the average. Among legitimate children the mortality was 24 per 1,000 births and among illegitimate children 41.

The neonatal-rate (deaths of infants under 28 days) was 18 per 1,000 live births and is one more than that for the corresponding quarter of 1961.

Perinatal deaths (stillbirths and infants under 7 days) numbered 907, and are equivalent to a rate of 35 per 1,000 total births (including stillbirths). This rate is one below that for the corresponding quarter of 1961.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 25th September, 1962, was 192,230 of which 55,742 were in Glasgow, 14,567 in Edinburgh, 6,343 in Aberdeen and 7,700 in Dundee.

TABLE IV. *Causes of Death during Third Quarters—Scotland*

International Detailed List Nos.	Cause of Death	Third Quarters				
		1962	1961	1960	1959	1958
001-008	Tuberculosis of respiratory system	83	82	83	92	113
010-019	Tuberculosis, other forms	6	9	11	17	11
020-029	Syphilis and its sequelae	8	14	14	18	12
045-048	Dysentery, all forms	—	1	2	3	—
056	Whooping cough	—	—	4	5	1
057	Meningococcal infections	5	1	3	6	4
080	Acute poliomyelitis	—	—	—	—	5
085	Measles	2	1	1	2	1
030-044, 049-055, 058-074, 081-084, 086-138	Other infective and parasitic diseases (B4, 5, 7, 8, 11, 13, 15, 16)*	22	44	23	38	34
140-205	<i>Malignant Neoplasms</i> <i>Total</i>	2,792	2,709	2,739	2,742	2,615
160-165	Malignant neoplasms of resp. system	684	611	630	639	599
200-205	Malignant neoplasms of lymphatic and hæmatopoietic tissues	152	146	134	119	112
140-159, 170-199	Other malignant neoplasms	1,956	1,952	1,975	1,984	1,904
210-239	Benign and unspecified neoplasms	26	28	33	38	20
260	Diabetes mellitus	121	126	134	125	120
290-293	Anæmias	52	56	63	60	46
240-254, 270-289, 294-299	Other general diseases	79	81	87	75	104
330-334	Vascular lesions affect'g cen. nerv. system	2,027	2,167	2,187	2,065	1,996
340	Non-meningococcal meningitis	8	13	10	1	11
300-326, 341-398	Other diseases of nervous system	220	221	215	183	201
400-402	Rheumatic fever	5	2	4	9	3
410-416	Chronic rheumatic heart disease	159	147	177	175	146
420-422	Arterioscl. and degen. heart disease	3,938	3,896	4,026	3,643	3,619
430-434	Other diseases of heart	183	220	207	185	191
440-443	Hypertensive heart disease	201	222	222	221	243
444-447	Other hypertensive disease	136	129	115	107	110
450-468	Other circulatory disease	430	449	391	307	356
480-483	Influenza	4	6	6	7	6
490-493	Pneumonia (except of newborn)	343	360	343	339	268
500-502	Bronchitis	348	305	347	233	227
470-475, 510-527	Other respiratory diseases	95	91	108	79	88
540, 541	Ulcer of stomach and duodenum	116	111	125	100	103
550-553	Appendicitis	10	15	23	20	17
560, 561, 570	Intestinal obstruction and hernia	88	87	76	72	90
543	Gastritis and duodenitis	2	1	6	3	3
571, 572	Diarrhœa (except of newborn)	62	57	92	65	59
581	Cirrhosis of liver	53	61	51	65	47
580, 582-586	Other diseases of liver	51	63	66	49	76
530-539, 542, 544, 545, 573-578, 587	Other digestive diseases	37	47	49	49	27
590-594	Nephritis and nephrosis	72	89	88	87	82
610	Hyperplasia of prostate	57	75	96	90	79
600-609, 611-637	Other diseases of genito-urinary system	127	107	89	107	76
640, 641, 651, 681, 682, 684	Puerperal sepsis including abortion with sepsis	—	7	3	2	6
642-650, 652-680, 683, 685-689	Other puerperal causes	7	7	5	7	10
690-749	Diseases of skin and organs of locom'n	53	65	72	57	57
750-759	Congenital malformations	181	171	145	172	157
760-762	B. injur's, post-natal asph'a & atelectasis	185	171	190	194	179
763	Pneumonia of newborn	7	11	14	15	12
764	Diarrhœa of newborn	2	2	5	2	1
765-768	Other infections of the newborn	—	5	3	6	2
769-776	Other diseases peculiar to early infancy and immaturity unqualified	157	125	131	130	140
794	Senility without mention of psychosis	64	75	80	95	113
780-793, 795	Ill-defined and unknown causes	79	88	82	73	75
E963, E970-E979	Suicide and self-inflicted injury	105	95	109	105	90
E810-E835	Motor vehicle accidents	183	185	176	153	173
E840-E845	Other road vehicle accidents	3	2	5	2	11
E870-E936 (part) E961 (pt), E962 (pt)	Accidents in the home	307	241	208	195	218
Rem. of E800-E999	Other violence (BE50)	158	166	161	208	210
	All Causes	13,459	13,509	13,705	12,898	12,664

* Including typhoid fever, scarlet fever and streptococcal sore throat, diphtheria and acute infectious encephalitis.

ESTIMATED POPULATION, TOTAL, CIVILIAN AND DE FACTO BY SEX AND AGE, AS AT 30th JUNE, 1962

Total population comprises the civilian population, all members of H.M. Forces of Scottish domicile and Merchant Navy at home and abroad, but excludes Forces stationed in Scotland who are not of Scottish domicile.

Civilian population comprises all civilians but excludes Merchant Navy at home and abroad.

De facto population comprises the population, of all types, actually in Scotland.

(Figures in thousands)

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

JULY 1962

The mean temperature of 55.8°F was 3.0°F below average; this was the lowest July mean temperature since 1922. The warmest days occurred on the 1st, during the 9th to 13th and around the last few days of the month. The highest day temperature recorded was 78°F at Loch Tay (Ardtnaig) on the 13th, and the highest night minimum, 58°F at Balmacara in Wester Ross on the 10th and at St. Abb's Head and Dunbar on the 30th. The lowest temperature recorded was 30°F (2 degrees of air frost) on the 18th at Coalburn in Lanarkshire. On the ground the lowest temperature was recorded at Cannich on the 17th, when the thermometer read 24°F.

Sunshine amounts were above average in Western districts northwards from Argyll but there was a deficit elsewhere. The largest amount of sunshine was recorded at Prabost in the Isle of Skye (197 hours) and the most sunless place was Stenness in Orkney (79 hours).

Only in Eastern districts South of the Moray Firth did rainfall amounts exceed average and in many western parts totals were only about half the normal falls. With the exception of the 10th and 11th only small amounts of rain were reported here and there during the first 17 days of the month but during the 18th to 24th and on the 29th and 30th heavier falls occurred quite generally. The 21st was a particularly wet day in the Northeast and falls of over 2 inches were reported from a few stations that day including 2.20 inches at Forglan Gardens in Banffshire. On the 18th a fall of 2.15 inches was measured at Kingairloch.

Gales were reported on 6 days and fog on 13 days. Thunder was heard on 5 days and an auroral display was witnessed on one night.

AUGUST 1962

The mean temperature was 55.5°F, 2.4°F below average. Temperature maxima were very low for August, the highest temperature recorded at any station being 70°F at Palnure (13th). Forres (19th and 20th), Dundee (30th) and Benmore (Argyllshire), Paisley, Coatbridge and Largs all on 14th. This represents the lowest absolute maximum temperature for any August since 1856, except for 1912 when it was equalled. The coldest nights were around the 8th, 13th and 14th and the lowest air temperature recorded was 30°F (2 degrees of frost) at Glenshee on 13th and at Achnashellach, Cannich, Braemar and Balmoral on 14th. Day maximum temperatures were very low generally and on the 15th only reached 50°F at Balmoral, Auchterhouse, Whitehillocks (Angus) and Glenshee Lodge while at a high level station at Lowther Hill it only reached 46°F on the 22nd. The highest night minimum temperature was 59°F, recorded at Forres, Elgin and Lossiemouth on the 20th. On the ground the lowest temperature recorded was 22°F (10 degrees of frost) at Cannich on the 14th.

Sunshine was below average only in some South-western districts and in places adjacent to the Caledonian Canal. Marchmont in Berwickshire had an excess of 45 hours. Other noteworthy excesses were Leuchars and St. Andrews 38 hours and Baltasound 36 hours. Onich on the other hand had a deficit of 13 hours. The sunniest place was Dunbar with 211 hours.

A restricted area of the extreme South-east had less than average rainfall but in all other parts there were excesses and some places had as much as twice the average amount. It was the wettest August at Stornoway since 1933, at Glenbranter since 1926 and at Craibstone since 1930. On the 4th a fall of 3.89 inches was reported from Gobersnuisgach in Sutherland and 3.04 inches at Loch More Lodge (Achfary).

Gales were reported on 14 days, fog on 8 days and sleet on 3 days. Thunder was heard on 10 days and Auroral displays were seen on 11 nights.

SEPTEMBER 1962

The mean temperature was 52.8°F, 1.4°F below average. The first few days were the warmest and the highest temperature was 76°F reported from Fyvie Castle on the 1st. The highest night minimum temperature was 58°F at Cupar, St. Andrews, Haddington and at stations in Edinburgh overnight 1st/2nd. The lowest air temperature was 29°F (3 degrees of frost) at Glenshee Lodge on the 13th and the lowest maximum temperature reached on any day was 46°F at Earls Hill (Stirlingshire) on the 11th. On the ground the absolute minimum for the month was 20°F (12 degrees of frost) on the 13th.

Substantial deficits of sunshine were reported from most places. At Kirkcaldy, Arbroath, St. Andrews and Edinburgh the amounts reported were as much as 60-75 hours below average. At the Royal Observatory, Edinburgh the total was 64 hours which is the lowest September sunshine total there since 1896 and many other stations reported their most sunless September for considerable periods. Benbecula with 108 hours was the sunniest place and Poolewe, Campbeltown and Largs were the only other stations reaching or exceeding the century of hours.

Rainfall was below average only along the coastal strip of the Moray Firth and in areas north of the Caledonian Canal excepting Shetland. In parts of Angus and at some inland places in South Scotland amounts were twice the average. The 9th, 29th and 30th were particularly wet days generally. Noteworthy falls were 3.41 inches at Daer, 3.23 inches at Glenquoy Reservoir and 3.04 inches at Peden Reservoir, all on 9th.

Gales were reported on 14 days, fog on 14 days and sleet on 1 day. Thunder was heard on 8 days and aurora seen on 13 nights.

EXPLANATORY NOTES

In this Preliminary Return—

Birth, death and marriage-rates are calculated on the estimated population of Scotland as at 30th June, 1962.
References to an average or average rate are to the average annual rate over the five years 1957-1961.

Abstract of Meteorological observations made at eleven of the Principal Towns during the quarter	39

EXPLANATORY NOTES

Birth, death and marriage-rates are calculated on the estimated population at 31st December, 1962.

References to average or average rate are to the average rates for the corresponding quarters of the five years 1957-1961.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

NOTE.—*In addition to the usual quarterly return of births, deaths and marriages which begins on page 11, this Report provides on pages 3 to 10 a short preliminary return of the main population and vital statistics for the year 1962. The full statistics will in due course be given in the Registrar-General's Annual Report. The figures now given are provisional but may be taken as fairly accurate.*

Preliminary Return for 1962

The population and vital statistics for the year 1962 are given in Tables IA and IIA on pages 5 to 9 of this Return. The main features of the tables are briefly indicated below.

Population. The population resident in Scotland at 30th June, 1962, is estimated to have been 5,196,600. The natural increase during the year ended 30th June, was 39,100 and the estimated net migration loss was 29,500, of which it is estimated that 20,500 went to other parts of the United Kingdom and 9,000 abroad.

Births. 104,334 births were registered in 1962, a rate of 20·1 per thousand. This is 0·6 above the 1961 rate and 0·7 above the average. 1,070 boys were born for every 1,000 girls.

Stillbirths numbered 2,122 and are 25 less than in 1961. The rate is 19·9 per 1,000 births (live and still) and is the lowest stillbirth rate yet recorded in Scotland.

Marriages. Marriages registered during the year numbered 40,255. This represents a rate of 7·7 and is 0·1 below that for 1961 and 0·2 below the average. 32,137 of the marriages were solemnised by Ministers of religion, 32,038 having been preceded by proclamation of banns or by publication of notice, and 99 authorised by Sheriff's licence in accordance with the provisions of the Marriage (Scotland) Act, 1939. 8,116 marriages were contracted in the offices of Authorised Registrars and 2 were registered on the authority of the Court of Session. Civil marriages comprise 20·2 per cent of the total marriages.

Deaths. Deaths from all causes numbered 63,188 and equal a death-rate of 12·2 per thousand. The rate is 0·1 above the average. The average in the five years before the war (1934-1938) was 13·2.

There were 2,768 infant deaths under one year giving a rate of 26·5 per 1,000 live births compared with the record low of 25·8 in 1961. Of these deaths 1,867 were under four weeks, a neonatal rate of 17·9. The perinatal deaths numbered 3,709 and equal a rate of 34·8 per 1,000 total births.

Table IIA shows the total number of deaths registered in Scotland during the year, classified by sex and cause, and also the number by age and cause.

A comparison of deaths by age-groups in 1962 and 1961 shows increases in the age-groups 5 to 44. The greatest increase was in age-group 35-44. The death-rate at ages under 45 was 1·9 per 1,000 and at ages 45 and over 31·5. In 1961 the corresponding rates were 1·9 and 32·0.

Causes of Death. The number of deaths from the principal epidemic diseases* was 184, 221 fewer than in 1961. The death-rate is 4 per 100,000. The reduction was due mainly to influenzal deaths which numbered 151 compared with 365 in 1961. There were 21 deaths from meningococcal infections (16 in 1961), 9 from measles (18), 2 from whooping cough (4), 1 from streptococcal sore throat (2), none from diphtheria (0) and none from typhoid fever (0). There were 4 deaths from acute poliomyelitis (0).

Deaths from tuberculosis (all forms) dropped to a record low figure of 435. The death-rate is 8 per 100,000, 4 below the average. 402 of the deaths were from respiratory tuberculosis, 31 fewer than in the previous year and the rate of 8 is 2 below the average. Deaths from non-respiratory tuberculosis at 33 were 15 fewer than in 1961.

Deaths from cancer numbered 11,476 and were 255 more than in 1961 and 503 above the average for the years 1957-1961. Deaths from cancer of the respiratory system accounted for 2,729 compared with 2,610 in 1961 and the average number of 2,441.

Deaths from heart disease numbered 21,661 and were 387 fewer than in 1961. They accounted for 34 per cent. of all deaths.

From vascular lesions affecting the central nervous system there were 9,810 deaths against 9,839 in 1961, from diabetes 530 against 599, and ulcer of stomach and duodenum 541 against 555.

Deaths from diseases of the respiratory system (not tubercular, malignant or influenzal) numbered 5,199 which were 398 less than in 1961. They included 2,210 from pneumonia (except of newborn) and 2,474 from bronchitis, the rates per 100,000 being 43 and 48 respectively. Compared with 1961 the number from pneumonia was 263 fewer and from bronchitis 42 fewer.

Deaths from diseases and accidents of pregnancy and childbirth numbered 42 as against 37 in 1961. This represents a rate of 0.4 per 1,000 births (live and still).

Deaths from congenital malformations and diseases of early infancy numbered 2,218 and were 71 more than in 1961.

Deaths attributed to violence numbered 3,056 and were 145 more than in 1961. Of these 471 were ascribed to suicide, 683 to road transport accidents, 1,248 to accidents in the home and 654 to other forms of violence. The numbers from these causes in 1961 were 409, 722, 1,211 and 569 respectively.

In Table IA will be found the main figures and rates for Scotland, cities, large burghs and remainder of counties with individual figures for each area.

On page 10 will be found tables giving details of deaths from accidents in the home and transport accidents by sex, age and broad cause groups for the year 1962.

*See note on page 5.

December 1962 Quarterly Return of the Registrar-General for Scotland

Page 10 Table IIIa

International Detailed List Nos. for E981-E895 substitute E891-E895

E900-E904 Falls, All Ages - Females, for 320 substitute 370

General Registry Office of Births, &c.,
New Register House,
EDINBURGH, 29th May, 1963.

Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 31st December, 1962

REPORT

Summary. The birth-rate is above that for the fourth quarter of 1961, and is above the average.

The stillbirth-rate is below the average.

The marriage-rate is above that for the corresponding quarter in 1961 and also above the average.

The death-rate is below that for the fourth quarter of 1961, and also below the average.

The infant mortality rate is below the average.

Live Births. 25,558 births were registered in the quarter under review, 995 more than in the corresponding quarter of 1961. The rate per 1,000 population is 19·5, being 0·7 above that in the fourth quarter of 1961 and 0·8 above the average.

The proportion of illegitimate births, 4·8 per cent., is the same as that for the fourth quarter of 1961 and 0·5 above the average.

Of the 25,558 births, 13,149 were of male children and 12,409 of female children, being 1,060 male births per 1,000 females. Births registered in October numbered 9,372, in November 8,045 and in December 8,141, the equivalent birth-rates being 21·2, 18·8 and 18·4 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 513, and is equivalent to a rate of 20 per 1,000 total births (including stillbirths). The rate is the same as that for the corresponding quarter in 1961 and 2 below the average.

Marriages. The number of marriages registered, 10,174, is 279 more than for the fourth quarter of 1961. The rate per 1,000 population is 7·8. It is 0·2 above that for the corresponding quarter of 1961 and 0·5 above the average.

Of the 10,174 marriages, 2,079 were civil marriages contracted in Registrars' offices, 8,094 were solemnized by a Minister of religion, and one was registered on the authority of the Court of Session. In the corresponding quarter of 1961 civil marriages numbered 1,875 and those with a religious ceremony 8,020.

Marriages registered in October numbered 5,365, in November 2,029, and in December 2,780, the equivalent marriage-rates being 12·1, 4·7 and 6·3 respectively.

Deaths. Deaths registered during the quarter numbered 15,719, and equal a death-rate of 12·0 per 1,000 population. They are 753 fewer than were registered in the corresponding quarter of 1961. The rate is 0·6 less than in that quarter and 0·2 below the average.

Deaths registered in October numbered 4,775, in November 5,108 and in December 5,836, the equivalent death-rates being 10·8, 11·9 and 13·2 respectively.

Infant Mortality. Deaths of children under one year numbered 657 and are equivalent to an infant mortality rate of 26 per 1,000 registered live births. This rate is the same as that for the corresponding quarter of 1961, and 2 below the average. Among legitimate children the mortality was 25 per 1,000 births and among illegitimate children 44.

The neonatal rate (deaths of infants under 28 days) was 16 per 1,000 live births, and is 2 below that for the corresponding quarter of 1961.

Perinatal deaths (stillbirths and infants under 7 days) numbered 867, and are equivalent to a rate of 33 per 1,000 total births (including stillbirths). This rate is 2 below that for the previous quarter.

Sickness Benefit. The number of new claims to sickness benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 25th December, 1962, was 259,156 of which 73,191 were in Glasgow, 21,166 in Edinburgh, 10,008 in Dundee and 9,434 in Aberdeen.

SCOTLAND

Estimated Total Population, Mid-1962, projected to Mid-1982 by sex and age

Basis: Mid-1962 estimate of Total Population (including Scottish Armed Forces and Merchant Seamen at home and abroad, but excluding Forces stationed in Scotland who are not of Scottish domicile).

Assumptions:

Mortality: Steady decline of death-rates over the period to rather more than one-half of the rates experienced in 1957-61 at ages under 45, and progressively less improvement at ages over 45.

Fertility: Births averaging 106,000 a year in the first five years and thereafter increasing to 110,000 a year by 1972, and to 115,000 a year by 1982. Male to Female ratio 1.06.

Migration: An annual net loss of 30,000 persons in the first year, decreasing to 22,000 in 1966-67 and later years. (Males and females in equal numbers).

(Thousands)

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

OCTOBER 1962

The mean temperature was 50.4°F., which was 2.0°F. above average. It was warmest during the first nine days and again around the 18th. The 8th was a particularly warm day generally, and at Gordon Castle a temperature of 71°F. was recorded. The highest night minimum temperature (55°F.) was reported from Poolewe on the 6th, and also from stations in the Moray Firth area on the 18th. The lowest air temperature recorded was 21°F. (11 degrees of frost) at Carnwath on 27th and at Glentress Forest near Peebles on 29th, while the lowest maximum temperature reached on any day was 38°F. at Glenshee Lodge on 26th and at Glenmore Lodge on 29th. The lowest ground temperature recorded over grass was 16°F. at Marchmont House on the 27th.

Sunshine totals were about or above average in places near the Forth-Clyde valley and further south but there were deficits to the North of these areas. Stornoway and Dundee had deficits of 20 hours compared with average and Dumfries an excess of 29 hours. Dunbar with 122 hours recorded the largest amount of sunshine from stations in Scotland.

All areas had rainfall amounts below average. Totals varied from about 80 per cent in the North-west to less than 20 per cent at places in the East. At Arbroath and Montrose it was the driest October since at least 1866 and at Dyce (Craibstone) since at least 1924. The wettest period was the 27th to 31st but the 17th was also a wet day, particularly in the North-west. At Poolewe 1.79 inches of rain was measured for the 17th.

Gales were reported on 15 days, fog on 18 days and thunder was heard on 7 days. Snow or sleet was reported from one place or another on 9 days and aurora was seen on 17 nights.

NOVEMBER 1962

The mean temperature of 41.1°F. was 1.2°F. below average. The 5th, 6th and 8th were the warmest days fairly generally and the highest temperature recorded was 60°F. at Kinlochewe on the 5th. The highest night minimum temperature reported was 51°F. at Kinlochewe and Palmure (Ayrshire) overnight on 6th/7th and at Renfrew on 8th/9th. The coldest period was the 16th-22nd and the absolute air minimum temperature was 5°F. (27 degrees of frost) at West Linton on the 21st. The same station also reported the lowest temperature over grass (4°F.) both on the 20th/21st. On the 20th air temperature never exceeded 26°F. (6 degrees of air frost) at any time at Lauder.

Sunshine amounts were about or very slightly below average in places in the Shetlands, eastern Fife and in Berwickshire. All other areas recorded larger deficits and at some places the month ranks as one of the most sunless Novembers in their records. Both Gordon Castle (Banffshire) and Craibstone (Aberdeen) measured amounts 26 hours less than average. Dunbar with 72 hours recorded the largest amount of sunshine.

There was an excess of rainfall over much of the eastern side of the mainland, but there was a deficit over the remainder of the country. Many western districts, in fact, had only about half the normal November amounts. Generally speaking the driest spells occurred about the 8th-12th and the 18th-21st while the 16th and 23rd were the days with most precipitation. During the 16th-19th snowfalls were widespread. On the 16th 2.06 inches of rain were recorded from such a fall at Astley Ainslie Hospital in Edinburgh.

Gales were reported on 16 days, fog on 21 days and thunder was heard on 10 days. Snow or sleet was observed at one place or another on 14 days and snow reported as lying at 9 a.m. on 14 mornings. Auroral displays were witnessed on 14 nights.

DECEMBER 1962

The mean temperature was 37.5°F., 2.1°F. below average. The warmest periods were from 4th-7th and around 14th-15th with the highest temperature of 55°F. occurring at Mertoun (near St. Boswells) and at West Freugh on 15th. The highest night minimum temperature was 49°F. at Poolewe overnight 4th/5th. The lowest minimum air temperature reported was 3°F. (29 degrees of air frost) at Braemar overnight 29th/30th and on thermometers exposed on the ground (or just above snow) the lowest temperature was 4°F. at Inverlmond (near Perth) on the same night. On the 30th temperature never exceeded 23°F. at Earl's Hill (Stirling) and it only rose to 26°F. at Cumbernauld on the 28th.

Sunshine totals were mostly above December averages except for a few places adjacent to the inner Moray Firth. Some places in the South had quite large excesses, the most noteworthy being Marchmont and Dumfries with excesses of 20 hours and 16 hours respectively, and Eskdalemuir with 19 hours more than average.

Precipitation was appreciably above average only over the northern half of the country. Only small amounts of rain fell generally during the first week but the 7th was a particularly wet day. The heaviest daily fall however was 2.76 inches at Dalness in Argyll on the 14th. Falls of snow were widespread during the latter part of the month and much of the country was snow covered during the last week.

Gales were reported on 16 days. On the 15th gusts of 117 m.p.h. and 98 m.p.h. were recorded at Lowther Hill in Lanarkshire and Tiree respectively. Fog was reported on 22 days, thunder on 8 days, snow or sleet on 24 days and snow was reported as lying at one place or another on 22 mornings. Auroral displays were seen on 14 nights.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS
